

Fukushima Fallout Awareness Network

**Declares Food Safety
A Basic Human Right!**
THIS INDEPENDENCE DAY:
**Sign FFAN's Food Safety
Petition to the FDA!**

Sign here → [http.FFAN.us](http://FFAN.us)

**BE FREE FROM HARMFUL RADIOACTIVE
CONTAMINATION IN OUR FOOD SUPPLY!**

**Tell the FDA:
SET SAFE STANDARDS TODAY!**

"We are alarmed at the lack of testing currently in place to meet the present-and-growing threat of Cesium 134 and 137 contamination in our food supply. The time is past-due for a comprehensive response to radiation present in our food supply from the Fukushima disaster.

"... FDA should promulgate a binding U.S. threshold of 5 Bq kg of Cesium 134 – 137 contamination, but there is no safe dose. Consumers should have the information they need to manage their own Cesium 134/137 intake. The FDA should require the testing and labeling of Cesium 134/137 in food."

*—Alexis Lynn Baden-Mayer
Political Director, Organic Consumers Association.*
